

NORD Center of Excellence for Rare Disorders at Boston Children's Hospital

RARE DISEASE GRAND ROUNDS

CME Course 220901-RSS

Thursday, March 23, 2023 | 12:00pm-1:00pm EST | Virtual Event

SPEAKER

Dr. Emma Palmer is a senior clinical lecturer at the University of New South Wales, Australia and holds a research fellowship from the Australian National Health and Medical Research Council.

Her work as a Clinical Geneticist at Sydney Children's Hospitals Network, seeing families with rare genetic conditions, informs her research, which aims to improve the patient journey for the 2 million Australians and 300 million people globally with a rare disease

"SUPPORTING THE ZEBRAS: AN AUSTRALIAN APPROACH TO PERSON-CENTRED RARE DISEASE CARE"

LEARNING OBJECTIVES

1. To understand how Australia's National Strategic Action Plan for Rare Diseases has enabled disease-agnostic approaches for rare conditions
2. To recognise the need to partner with rare disease organisations and patients to co-design effective clinical educational approaches.
3. To recognise what international collaborative work in rare disease care is needed to bring equitable access to high quality care for the 300 million people living with rare diseases globally
